## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-7, in the reply filed on 03/08/2005 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 6,049,938 to Jimison. See Figs. 12-20 of the Jimison patent and the related detailed description of Figs. 12-20.

Regarding the recitation "for enclosing as object that may cause an allergic reaction", in applicant's claims 1 and 5, has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951).

Regarding claims 2 and 6, the clear outer material (58) of the Jimison patent meets applicant's "see-through...stretchable material" limitation to the degree that all materials have a degree of stretchability.

Art Unit: 3727
